

Your Class Feis with

Digital Feis™

Digital Feis is a video feis system created to make Irish dancing competitions accessible to as many dancers as possible. Record your dancing at home or your studio, send in your entries, and get feedback via email. Dances are US\$8.00 each.

How to Run Your Class Feis with Digital Feis

Decide on your syllabus

You can choose to utilize the 5-level Digital Feis syllabus, or we can adapt to your levels.

Choose your awards

Class feis dances are US\$8 each, as they do not currently include medals. We send printable scoresheets, and you can give out your own certificates, ribbons, medals and/or trophies.

Check your recording equipment

Most newer smartphones record great video! Please use a tripod with a smartphone holder whenever possible for stability, and record **horizontally**. You can send us a sample video for quality check.

Submit your request on our website

Fill out the form at www.digitalfeis.co/class to request your class feis schedule. Requested dates are not guaranteed. We may need more time for setup and an adjudicator training check-in if you are using a new syllabus. We'll take you through the steps to set up your feis. A US\$50 setup fee is required once the feis is scheduled.

Print your numbers and record your dances

Unlike our worldwide open Digital Feis competitions, a class feis can number dancers any way they need. Download our number card PDF at www.digitalfeis.co/class and print on cardstock to use number cards we know we'll be able to read on camera. Use our Class Feis Recording Sign-In & Tracker sheet to check dancers in, mark what's already been recorded, and stay organized.

Videos must be named **000 Level Dance**. For example, *317 Beginner Light Jig.mp4*.

Submit your feis videos

When your feis is scheduled, you will receive a link to your Class Feis form page to submit your videos and pay. Turnaround may be up to 10 days depending on number of dancers. *Highlight results videos are not included with class feiseanna.*

Please note that class feiseanna do not count towards level advancement.

Digital Feis Scoresheets

The Digital Feis syllabus includes a clear explanation of scores, a dancer's strengths, and suggestions for improvements from every feis.

2018 February Digital Feis Results

000, Shannon O'Shea — Example School

Beginner Reel — Under 13
9 Dancers in this competition

My Total Score	My Rank
70.0	5th Place

Knowledge	Timing	Upper Body	Lower Body	Presentation
14	14	15	13	14

Exceeding more strongly/fluently when pointing, lift all the way up to back on point-toe-backs. Pay close attention to your feet when you change/step back — they should be one inch in front of the other, and set them to rise to the. Good sense of rhythm. Areas can be improved, but they are an acceptable amount of wiggle for a beginner.

Dancer does not advance yet.

What Do My Scores Mean?

18–20, Outstanding
I have mastered this category for this dance, at this level.

15–17, Strong Area
I am accomplished at this; it is one of my strengths.

12–14, Satisfactory
I am doing a good job of learning this, and will keep improving.

7–11, Weak Area
I am having trouble with this right now, but I am looking forward to getting better.

0–6, Incomplete/Inappropriate
Used when a dancer is dancing unsafely, when a dance is not the required length, or the dancer has insisted on competing at an inappropriate level after being warned.

Digital Feis scoring categories

Knowledge, Timing, Upper Body, Lower Body, and Presentation

We have found that these categories are best for communicating clearly to the dancer.

Digital Feis points per category

18–20, Outstanding. I have mastered this category, for this dance, at this level.

15–17, Strong Area. I am accomplished at this; it is one of my strengths.

12–14, Satisfactory. I am doing a good job of learning this, and will keep improving.

7–11, Weak Area. I am having trouble with this right now, but I am looking forward to getting better.

0–6, Incomplete or inappropriate. Used when a dancer is dancing unsafely, when a dance is not the required length.
